OTHER INFORMATION

Call data

Because your Pack allows unlimited calls, we do not make itemised call details available.

Data consumption

A typical 10 minute voice conversation on Belong Voice will use approximately 4MB of your internet data.

Your Belong Voice number

You cannot choose your Belong Voice number. We will allocate you a number based on your State of residence, but your number may not be a local number to your area. This means people calling you may pay a long distance call rate instead of a local call rate even if they live in your area.

You can also keep using the same Belong Voice number if you move somewhere else within your State, however should you move interstate, you'll be issued a new Belong Voice number as part of the moves process.

You will not be able to port an existing number from another service provider or to port your Belong Voice number to another service provider.

Important information

The Belong Voice service uses the Internet and will not work in the event of a power outage. We cannot guarantee that your Belong Voice service will work 24/7, and we recommend that you do not rely on this service for making emergency calls, including calls to 000.

Please note that some mobile network operators may prohibit or restrict the use of Voice over Internet Protocol services over mobile data on their network and may also impose additional fees or other charges.
